People Counting System for Al Mazar Mall in Marrakech

plettac electronics Maghreb has implemented a new people counting system in the Al Mazar Mall in Marrakech that helps to the control of the number of people that access into the mall or that leaves it.

This system has been installed in the 12 entries into the Mall and it allows the extraction of statistical information about the number of daily visits as well as the peak business moments.

The system is fully scalable and flexible to customer needs and it has been tested with 94% reliability.
